## R2602P Upgrade

Ryco have recently upgraded our product offering for the R2602P. All product now leaving our warehouse include the filter element, as before, and include the seal required for the service change. This change now enables the mechanics to change the filter without having to worry about ordering the seal separately.

Applications: HOLDEN Astra 2.2i, TS Astra 2.2 Z22SE, Vectra ZC, Zafira Wagon TT 4900. SAAB 9-3.

Insist on Ryco. The professional's choice.
